

**THE EMBODIMENTS OF THE INVENTION IN WHICH AN EXCLUSIVE
PROPERTY OR PRIVILEGE IS CLAIMED ARE DEFINED AS FOLLOWS:**

1. A member selected from the group of members
5 consisting of a chair member, a bed member and a lounge
member, said member including means having electrical
power requirements, said member also having an energy
converter which converts energy to which the chair is
exposed to electrical energy for meeting the electrical
10 power requirements.
2. A member as claimed in Claim 1 wherein said energy
converter comprises a solar panel provided on an exposed
surface of said member.
15
3. A member as claimed in Claim 2 wherein said means
having electrical power requirements comprises a
biorhythm sensor.
- 20 4. A member as claimed in Claim 3 including a digital
display also powered by said solar panel.
5. A member as claimed in Claim 1 wherein said means
having electrical power requirements comprises a
25 biorhythm sensor.
6. A member as claimed in Claim 5 wherein said means
having electrical power requirements additionally
comprises a digital display for displaying biorhythms
30 sensed by said sensor.
7. A member as claimed in Claim 1 wherein said energy
converter comprises a generator which converts motion of
the chair to the electrical energy.
35
8. A member as claimed in Claim 1 wherein said means

having electrical power requirements comprises a control for said chair.

9. A member as claimed in Claim 7 wherein said
5 control provides audio feedback providing directions for use of said control.

10. A member as claimed in Claim 7 wherein said
control provides electrical adjustment for an adjustable
10 part of said member.

11. A member as claimed in Claim 1 including a power
pack which is charged by said energy converter, said
power pack storing the electrical energy and dispersing
15 the electrical energy as required.

12. A member as claimed in Claim 1 having electrically
operated body repositioning means powered by said energy
converter.
20

13. A member as claimed in Claim 12 wherein said
member comprises a chair and said body repositioning
means comprises a lumbar adjustment member.

14. A member as claimed in Claim 13 including an
electrically operated timer which provides timed interval
repositioning of said lumbar adjustment member.
25

15. A member as claimed in Claim 1 wherein said member
30 includes an electrically operated vibrator powered by said energy converter.

16. A member as claimed in Claim 15 including an
electrically operated timer which is powered by said
energy converter and which provides timed operation of
35 said vibrator.

17. A member as claimed in Claim 1 including heating means powered by said energy converter.
